

## **Lenora Bohren**

Lenora Bohren, Ph.D. is a Research Scientist and Director of the National Center for Vehicle Emissions Control and Safety (NCVECS) at Colorado State University (CSU). Lenora has been working on environmental issues with organizations such as the USEPA and the USDA. She has helped develop methodologies to assess the socio-economic characteristics of managing tropical soils and has conducted air pollution studies throughout the United States and Mexico. The US/Mexico studies included an analysis of mobile source emissions and driver attitudes along the border. Most recently, she has coordinated the Human Factors Section of the OBDII Center at the National Center for Vehicle Emissions Control and Safety.
