

S. Jay Gordon, Jr.
President and Founder
Gordon-Darby

Jay Gordon is the President and Founder of Gordon-Darby. Mr. Gordon and his associates have successfully designed, contracted and implemented state emissions inspection programs in Kentucky, Arizona and Florida. Under his leadership these programs have gained excellent recognition for advanced state-of-the-art design and reliable performance. Mr. Gordon's technical expertise is extensive and plays a primary role in all aspects of Gordon-Darby's equipment and system design (1983 - present).

Prior to Gordon-Darby, Mr. Gordon has broad experience in Engineering and Consultation. His main focus was based on planning and development, construction, manufacturing, technical functions, equipment design and quality assurance. He also instructed engineering programs at the University of Louisville in relation to construction technologies including courses dealing with cost estimating, materials testing, surveying, material static and dynamics.

He is a native of Louisville, Kentucky and received his Master of Engineering and BS Civil Engineering from the University of Louisville.

Mr. Gordon has two passions in his life. First as devoted husband to Denise and father to Jeff and Sarah. Secondly, as an accomplished airplane pilot of both vintage and newer model airplanes.
