

## **Rob Klausmeier – de la Torre Klausmeier Consulting, Inc.**

Mr. Klausmeier specializes in the analysis and implementation of mobile source control strategies. He is a national recognized authority in in-use emissions assessments, inspection/maintenance (I/M) programs, alternative fuels and other control strategies for mobile sources. He understands the complex factors that influence vehicle emissions once a vehicle is placed in the hands of a consumer. In 1994, Mr. Klausmeier formed his own consulting company, de la Torre Klausmeier Consulting, Inc (dKC). Prior to this, he was employed by Radian Corporation. During Mr. Klausmeier's 24 years with Radian Corporation and dKC, he has managed a range of programs with an emphasis on automotive engineering, air quality impact evaluations, computerized model development, and database development.
