

## **Biographical Material on**

**Frank A. Krich**

**Senior Planning Specialist  
Environmental & Energy Planning  
DaimlerChrysler Corporation**

### **Experience**

Mr. Krich joined DaimlerChrysler Corporation in 1985. As a Senior Planning Specialist, Mr. Krich is currently responsible for directing corporate-wide environmental planning and program development efforts related to California mobile emissions, onboard diagnostics, service information and inspection and maintenance programs. This involves representing the Corporation before federal, state and local governmental agencies in matters related to the development of new, and the amendment of existing laws and regulations.

Prior to joining DaimlerChrysler Corporation, Mr. Krich was a Senior Engineer for Mobil Corporation. In this position, Mr. Krich was responsible for project cost control on the New Zealand Gas-to-Gasoline project. Prior to Mobil, Mr. Krich was a Project Engineer for Rockwell International where he was responsible for the modification and start-up of an existing nuclear waste reprocessing plant.

### **Education**

Mr. Krich earned a Master of Business Administration degree from the University of Detroit in 1992 and a Bachelors of Science degree in Chemical Engineering from the University of Southern California in 1974.
