

**John Trajnowski
Principal Staff Engineer
Ford Motor Company
Environmental and Safety Engineering**

John Trajnowski has been with Ford Motor Company since 1978, and has worked in the Emissions Regulatory Planning Department since 1992. His duties include following the OBD II and service information regulatory activity from EPA and CARB. He is also responsible for following heavy-duty truck and non-road engine emission regulations. His prior Ford work experiences included various engineering assignments in the emissions test laboratory, emissions laboratory correlation, and vehicle emissions certification activities. Mr. Trajnowski holds a B.S. degree in Electrical Engineering from Michigan State University.
